Farm Product Exports Headed For New Record In 1978	4
U.S. Agricultural Imports Rise 11 Percent During First 11 Months Of Calendar 1978	25
Commercial Financing Under The CCC Export Credit Sales Program Reaches Record \$1.6 Billion In Fiscal 1978	50
Fiscal 1978 Concessional Government Program Exports Highest Since 1965	54
Selected Prices of International Significance	63

The contributors to this issue are Susan A. Libbin, Fannye G. Lockley, and H. Christine Collins. Principal coordinators are Robert L. Tontz, Thomas A. Warden, and Thomasine B. McCall, Statistics Program Area, Foreign Demand and Competition Division, Economics, Statistics, and Cooperatives Service, Washington, D.C. 20250. (202) 447-8926.

Farm Product Exports Headed For New Record In 1978 (see p. 4) U.S. agricultural exports will probably exceed \$29 billion for the first time in 1978. January through November data show such exports at nearly \$26.7 billion, up 25 percent from similar months last year. November's export value reached a \$2.8-billion monthly record. The 11-month farm trade surplus amounted to \$13.2 billion, 44 percent ahead of 1977.

U.S. Agricultural Imports Rise 11 Percent During First 11 Months Of Calendar 1978 (see p. 25) U.S. agricultural imports totaled \$13.4 billion during January-November 1978, 11 percent higher than a year ago. Large value gains in imports of bananas, cocoa and cocoa products, live animals, meat, dairy products, fruits, vegetables, tobacco, wine, and malt beverages more than offset declines in coffee, tea, sugar, and vegetable oils.

Commercial Financing Under The CCC Export Credit Sales Program Reaches Record \$1.6 Billion In Fiscal 1978 (see p. 50). In fiscal 1978, the CCC Export Credit Sales Program, a commercial rather than concessional program, provided commercial export financing for agricultural products of nearly \$1.6 billion, one-and-one half times the value of the previous peak in 1973.

Fiscal 1978 Concessional Government Program Exports Highest Since 1965 (see p. 54) U.S. agricultural exports under concessional programs totaled \$1,544 million in fiscal 1978, slightly more than the previous year and their highest level since 1965. Increased disbursements under Agency for International Development programs more than offset a slight decline in shipments under Public Law 480 programs.

Selected Prices Of International Significance (see p. 63) Agricultural commodity prices continued their strong uptrend through November, as wheat, corn, cocoa beans, rubber, soybean meal, cotton, and imported beef prices made significant price gains. Soybean prices, in contrast, declined at Gulf Ports, but remained steady in Rotterdam. International coffee and sugar prices declined.

Farm Product Exports Headed for New Record in 1978

Agricultural exports will break all previous records in calendar year 1978, possibly exceeding \$29 billion. During the first 11 months (from January through November), U.S. agricultural exports totaled nearly \$26.7 billion, 25 percent above similar months a year earlier. The November value set a new monthly record at \$2.8 billion.

Export volume was substantial in November, primarily because of brisk foreign demand for grains and oilseeds. Grain movements, mainly to China, Japan, the U.S.S.R., and Brazil, and oilseed shipments to Western Europe contributed significantly in the increase. Principal export items totaled over 120 million tons during the 11-month period, reflecting strong gains in wheat, coarse grains, soybeans, and cotton.

Agricultural exports exceeded imports by over \$1.5 billion in November, bringing the cumulative 11-month trade surplus to \$13.2 billion. A 44-percent gain in the agricultural trade surplus from its year-earlier rate helped offset a widening deficit for nonagricultural items.

Growth in foreign demand for U.S. farm products was most pronounced in Centrally Planned countries and Latin America. In January-November, agricultural exports to the U.S.S.R. increased 88 percent from their year-earlier value. Eastern European countries took about 79 percent more, and exports to China expanded twelve-fold.

U.S. wheat exports during January-November surged 47 percent above shipments during similar months in 1977. Japan remained the largest single foreign market. Shipments to the U.S.S.R. moved up 7 percent. Rapid growth occurred in exports to Brazil, other Latin American countries, Pakistan, Iraq, the Philippines, and North Africa.

Coarse grain exports through November showed an 18-percent growth factor over year-earlier rates, primarily due to increased corn shipments. Japan took about 9 percent more, while exports to the U.S.S.R. more than tripled. Brazil, normally an exporter, took one million tons. Exports to Korea, Taiwan, and Spain were also substantially higher.

Soybean exports in November exceeded all previous monthly records at almost 2.77 million tons. Cumulative January-November 1978 shipments totaled 18.8 million tons, 28 percent above the previous 11-month record of 14.6 million tons in 1977. Increased exports to the European Community, Japan, Taiwan, Korea, the U.S.S.R., Spain, and Mexico accounted for most of the gain.

Table 1 --Agricultural, nonagricultural, and total trade balance

Item	January-November		November

CONTINUEC

U.S. Agricultural Imports Rise 11 Percent During First 11 Months of Calendar 1978

U.S. agricultural imports totaled \$13.4 billion during January-November 1978, 11 percent higher than a year ago. November imports, at nearly \$1.3 billion, were 57 percent above the previous November and at their highest monthly level since last April. During the first 11 months of 1978, large value gains in imports of bananas, cocoa and cocoa products, rubber, live animals, meat, dairy products, fruits, vegetables, tobacco, wine, and malt beverages more than offset substantial value declines in coffee, tea, sugar, and vegetable oils.

Imports of noncompetitive products--accounting for nearly half of all agricultural imports--totaled about \$6.4 billion, 2 percent higher than during January-November 1977. Coffee and tea were the only major noncompetitive imports that declined. Value gains in imports of cocoa and cocoa products, bananas, and rubber were mainly due to price inflation. Imports of green coffee, the leading agricultural import, totaled \$3.4 billion, 3 percent less than a year ago. However, the quantity imported rose by 22 percent as unit import prices of green coffee dropped from \$1.99 per pound to \$1.57 per pound. Tea imports, at \$103 million, were 38 percent less than a year ago, while the quantity declined by 27 percent.

Imports of competitive products totaled almost \$7.1 billion, 19 percent higher than a year ago. Except for sugar, vegetable oils, and cashew nuts, major competitive product imports rose during the first 11 months of calendar 1978. Live animal imports totaled \$250 million, about one-fifth higher than a year ago. Major gains occurred in imports of dutiable cattle and swine.

Meat imports accounted for the largest value gain among noncompetitive imports. Imports of fresh and frozen beef and veal--accounting for nearly two-thirds of all meat and meat products imports--totaled \$1,022 million, 65 percent higher than a year ago. With import unit prices of fresh and frozen beef and veal increasing by nearly one-third during the first 11 months of calendar 1978, the quantity imported rose by about one-fourth. In June, due to declining production and rising prices of beef and veal, an increase was announced in the voluntary quotas permitted under the Meat Import Law. The value of pork imports rose by 26 percent.

Fruit imports rose by 31 percent, while vegetable imports rose by about 22 percent. Among fruits, the largest gain was in concentrated orange juice which went from \$21 million to \$89 million during the first 11 months of calendar 1978. This increase, due to a severe freeze in the winter of 1977/78, led to a reduction in stocks, high domestic prices, and an increase in imports from Brazil.

Sugar imports--a leading agricultural import--totaled \$664 million during the first 11 months of calendar 1978, about one-fifth lower than a year ago. The 24-percent volume decline was due partly to higher import fees imposed in January.

Vegetable oil imports declined by about 6 percent, mainly due to a 42-percent decline in imports of palm oil. Palm oil accounted for about 22 percent of all vegetable oil imports. Large domestic supplies of soybean and cottonseed oils, at prices below palm oil, tended to reduce palm oil imports. Imports of coconut oil were slightly higher than a year ago.

Price inflation generally caused much of the value gain in imports of tobacco, wine, and malt beverages.

1/ PRELIMINARY

Commercial Financing Under the CCC Export Credit Sales Program Reaches Record \$1.6 Billion in Fiscal 1978

Beginning in 1956, the Commodity Credit Corporation announced an Export Credit Sales Program (CCC Credit or GSM-5) to maintain, develop and expand commercial sales for export of U.S. agricultural products in large exportable supply.^{1/} The program, a commercial rather than concessional program, is distinct from Public Law 480. The CCC credit program is designed to avoid replacement of cash sales and private financing. The financing is accomplished through purchase of the exporter's accounts receivable on credit terms from 6 to 36 months at interest rates in line with U.S. commercial bank rates. The interests rates are generally set above CCC's cost of funds, thus the program is self-supporting without cost to the taxpayer. Since its inception, the program has experienced an excellent history of repayment.

Generally, the CCC credit program has resulted in expanding agricultural exports. In many instances, program financing has helped offset transportation differentials between exporting countries, and subsidized prices, credit competition, and other incentives offered by competing countries. Many commercial markets would not have been developed at their present level without credit provided by the program.

CCC credit financing rose from less than \$15 million during fiscal 1956-58 to over \$100 million in 1964. ^{2/} During the next 8 years, CCC sales ranged from about \$100 million to nearly \$400 million annually, rising to \$1 billion in fiscal 1973 when grain sales to the U.S.S.R. market began. During the next 2 years, CCC credit sales fell to under \$300 million, largely because of reduced crops, but increased to \$755 million in fiscal 1977 (October 1976-September 1977). In fiscal 1978, CCC sales reached a record of nearly \$1.6 billion, 1-1/2 times the value of the previous peak in 1973. CCC credit sales have never exceeded 10 percent of total commercial agricultural exports in any year, except in certain countries. In fiscal 1978, 6 percent of all commercial agricultural exports received CCC export financing.

The majority of CCC credit is for financing commercial exports of wheat, feed grains (mainly corn), rice, cotton, tobacco, and vegetable oils (table 15). In fiscal 1978, \$468 million or 30 percent of all CCC export credit was for the commercial export of wheat. Another \$439 million financed corn exports and \$230 million was for CCC sales of cotton.

Since its inception, the program has provided smaller amounts of export financing for numerous other commodities, including breeding cattle, swine, flour, lard, inedible tallow, dairy products, raisins, prunes, and protein concentrates.

Since its inception, CCC credit has financed commercial agricultural exports to over 80 countries. In the last 2 fiscal years, however, most of the commercial exports financed by CCC credit sales went to 7 countries: Poland, Korea, Portugal, Pakistan, Greece, Peru, and the Philippines. In previous years, substantial CCC credit sales also went to Japan (10 to 15 years ago), the United Kingdom, the U.S.S.R., Yugoslavia, Romania, and Italy.

^{1/} For more detail on program operations and statistics, contact Commercial Export Programs, Office of General Sales Manager, U.S. Department of Agriculture, Washington, D.C. 20250.

^{2/} For statistics on CCC export credit financing by commodity and country of destination for fiscal 1956-73, see U.S. Agricultural Exports Under Public Law 480, ERS-Foreign 395; for fiscal 1974-75 data see FATUS, Dec. 1975; and for fiscal 1976 data see FATUS, Oct. 1976.

In 1978, the Commodity Credit Corporation and the Overseas Private Investment Corporation announced a joint effort to stimulate commercial exports of U.S. agricultural products through coordinated use of their export financing facilities. 3/ Similar action is also being carried by the Export-Import Bank. These efforts are designed to develop new outlets and to encourage expansion and improvement of livestock and processing industries in developing countries. Some of these countries are considered potential large commercial markets for U.S. feed grains, soybeans, wheat, and rice.

3/ Ralph Spencer, "CCC-OPIC Program Aimed At Boosting Farm Exports," Foreign Agriculture, Foreign Agricultural Service, July 31, 1978.

Fiscal 1978 Concessional Government Program Exports Highest Since 1965

In fiscal 1978 (October 1977-September 1978), U.S. agricultural exports under concessional Government-financed programs totaled \$1,544 million, slightly more than the previous year and their highest level since 1965. Increased disbursements under Agency for International Development (AID) programs more than offset a slight decline in shipments under Public Law 480 programs. Exports under Public Law 480 were valued at \$1,039 million, 3 percent less than the previous year.

U.S. commercial agricultural exports, which have risen annually since fiscal 1969, reached a record \$25.8 billion in fiscal 1978, 15 percent higher than a year ago. As in the past 5 years, Government program shipments continued to represent only about 6 percent of all U.S. agricultural exports.

Egypt was the principal recipient of Government program exports, accounting for about 27 percent of the program's total in fiscal 1978. Slightly over half of all Government program shipments to Egypt were AID sponsored; the remainder mostly Public Law 480 Title I exports. Israel, the second leading recipient, took 16 percent of the total--almost the entire amount under AID auspices. The other major recipients were Indonesia, India, Bangladesh, the Republic of Korea, and Pakistan.

U.S. commercial sales of agricultural commodities to countries also receiving concessional exports--Korea, Portugal, the Philippines, Pakistan, Indonesia, and Morocco--were record high throughout fiscal 1978. Commercial sales to Korea totaled nearly \$1 billion, making it the sixth largest cash market for U.S. agricultural products. Korea has been one of the 10 leading dollar markets for about 6 years.

Exports under Public Law 480 Title I (long term dollar and convertible foreign currency credits) totaled \$732 million in fiscal 1978, 4 percent below a year ago. However, due to rising prices, especially for wheat and rice, the quantity shipped under Title I declined 10 percent. Wheat accounted for over two-fifths of all exports under Title I. Due to rising prices, the value of wheat shipped under Title I rose 4 percent while the quantity declined 11 percent. Most of the wheat went to Egypt, Bangladesh, the Republic of Korea, Indonesia, and Pakistan. Rice, the second main commodity under Title I, declined in quantity much more than in value due to price inflation. Almost all of the rice went to Indonesia. Value and quantity exports of wheat flour and soybean oil under Title I increased in fiscal 1978, while exports of corn and cotton declined.

In the latter part of fiscal 1978, the United States signed the first agreements with two countries--Bolivia and Bangladesh--under the new Title III (Food for Development) section of Public Law 480, as amended in 1977. ^{1/} This section aims to encourage recipient countries to use the local currency proceeds from the sale of commodities provided under Title I authorization to promote their food and agricultural development, with emphasis on aiding the poorest segment of the rural population. Local currency proceeds used to carry out agreed projects or programs are considered as repayment of the debt incurred under the concessional sales agreement. Title III programs may range up to 5 years.

The agreement with Bolivia was for \$10.8 million of wheat/wheat flour for the first year of a 5-year program. The proceeds from the sale of these commodities will be used to improve living conditions of the rural poor, such as extension of credit to small farmers, development of farmer organizations, and village infrastructure.

^{1/} For detailed information on these agreements, contact the Office of the General Sales Manager, Public Law 480 Programs, U.S. Department of Agriculture, Washington, D.C. 20250.

The Title III program with Bangladesh totaled \$26 million of wheat (200,000 metric tons) for 1 year of a 3-year program valued at \$96.8 million. The Government will use the proceeds to encourage increased food production. Half the wheat will be sold on the open market, one-fourth will be distributed to low-income rural consumers through a ration system, and the remainder will be held in reserve. Statistics on U.S. shipments made under these programs will be reported as exports under Title I, since they are authorized under Title I agreements.

Donations under Title II programs totaled \$337 million in fiscal 1978, slightly less than the previous year. However, the quantity exported under Title II rose 11 percent due to lower prices for feed grains, nonfat dry milk, and blended food products. Over two-thirds of the donations went through voluntary relief agencies, such as CARE. Another 23 percent was distributed through the World Food Program and the remainder were Government-to-Government donations.

Although the value of nonfat dry milk and blended food products (corn-soya blend and wheat-flour soya) declined considerably, the quantity of nonfat dry milk donated rose by nearly one-third, while there was a small gain in the volume of donated blended food products. The decline in dry milk values reflects a change in the method of charging the Title II budget. India was the major recipient of Title II donations, receiving about 30 percent of the total. Bangladesh, the next largest recipient, received 6 percent of the donations.

In fiscal 1978, disbursements for agricultural commodities under AID reached a record \$475 million, 13 percent higher than the previous year. Data on AID programs represent payments or disbursements made by that agency for the commodities and may vary from the period when the commodities were actually shipped. Public Law 480 program data represent export market values of the shipments. Slightly over half of all AID disbursements were for Israel, mainly wheat, soybeans, and corn. The remainder was for Egypt, mostly corn, inedible tallow, cottonseed oil, and tobacco.

Wheat, valued at \$407 million in fiscal 1978, was the leading agricultural commodity under Government export programs, accounting for about 26 percent of total concessional shipments. The value of wheat declined 3 percent from the previous year, but due to rising prices, the quantity fell about 13 percent. Approximately four-fifths of the wheat went under Title I, with the remainder divided between Title II and AID. About 10 percent of all wheat exports were concessional in fiscal 1978 and commercial exports of wheat rose both in value and quantity.

Corn, valued at \$194 million, was the second leading commodity under concessional aid. Due to lower prices, the value of concessional corn exports--almost all under AID--declined slightly from the previous year, while the quantity rose about 10 percent. Only about 4 percent of all corn exports were concessional.

Rice, valued at \$169 million, was the third leading concessional export. Due to rising prices, the value of concessional rice exports--almost all under Title I--declined slightly, while the quantity fell by about one-fourth. About 20 percent of all U.S. rice exports were concessional in 1978, compared with about 26 percent the previous year. Both the quantity and value of commercial rice exports rose in fiscal 1978.

Soybean oil, the fourth leading concessional product, rose in both quantity and value in 1978. Nearly three-fourths was exported under Title I. In the last 2 years, about 27 percent of all soybean oil exports have been concessional.

Among the other leading concessional exports in 1978, there were value gains in wheat flour, bulgur wheat, cottonseed oil, and inedible tallow, while there were considerable

value declines in blended food products, nonfat dry milk, tobacco, and cotton. The quantities shipped rose for blended food products and nonfat dry milk.

In fiscal 1979, allocations were planned for Title I of \$785 million, compared with \$812 allocated in 1978. Title II allocations for 1979 are \$372 million.

1/ Preliminary.

2/ Includes dollar and convertible foreign currency sales.

3/ Includes donations through voluntary relief agencies, the World Food Program, and Government-to-Government donations.

4/ Differences between total exports as reported by bureau of the Census and Government programs which are recorded from a variety of sources may vary in reporting dates and procedures.

5/ Mainly corn.

6/ Corn, soybean milk and wheat-flour soya.

7/ Peanut oil.

8/ Cottonseed oil.

9/ Mostly oilcake and meal and soybean seed.

5/ Differences between total exports as reported by the Bureau of the Census and Government programs which are recorded from a variety of sources may vary in reporting dates.

6/ Formerly Afars and Issas.

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

International agricultural commodity prices continued a strong uptrend through November, as wheat, corn, cocoa beans, rubber, soybean meal, cotton, and imported beef prices made significant gains. Soybean prices, in contrast, declined at Gulf Ports and remained steady in Rotterdam. Coffee and sugar prices declined from October levels.

Strong export demand and U.S. grain stockpiling continued to strengthen U.S. wheat and corn export prices. The reduced U.S. wheat crop, coupled with Canada's difficulties in transporting wheat to exportable positions has buoyed international wheat prices. In November, the Gulf Ports price of wheat strengthened 4 percent to \$3.84 a bushel.

Despite the record 1978 U.S. corn crop, the Gulf Ports price for corn has strengthened to \$2.59 a bushel, a 4-percent increase explained by increased world use. Rotterdam prices for U.S. and Argentine corn and U.S. grain sorghum also strengthened.

Even though record supplies of vegetable oils and oilmeals are expected to come to market in 1979, world consumption of both protein meals and edible vegetable oils is expected to increase in 1979. As a result, U.S. exports of soybeans and products are expected to remain strong through the spring of 1979. New crop supplies slightly weakened the Gulf Ports soybean price to \$6.97 a bushel, but Rotterdam prices for soybeans and meal remained strong through November.

World rice production for 1978/79 is currently forecast at 376 million tons (rough basis), up 10 million tons from a year ago. New crop supplies have brought Thai rice prices down sharply to \$315 a ton.

A 6-percent decline in the 1978 world cotton crop and a continued uptrend in cotton consumption continues to strengthen international cotton prices. The Osaka price for U.S. Arizona cotton rose 7 percent in November to 79.8 cents a pound.

Among import commodities, coffee and cocoa bean prices diverged. A 9-percent increase in 1978/79 world coffee production lowered prices, while cocoa bean prices rose as a result of a 5-percent decline in the 1978/79 world cocoa bean crop. In November, the New York Spot price for Santos coffee declined 3 percent to \$1.50 a pound, while the New York cocoa bean futures price rose 6 percent to \$1.80 a pound.

While world sugar production is forecast to be down from last season's record level, the huge volume of sugar stocks has kept world prices low. In November, the New York Spot price for raw cane sugar averaged 14 cents a pound, down slightly from October.

Crude rubber prices continued to climb as a result of continued strong demand. The New York Spot price for rubber reached 59 cents a pound in November.
